

Validated Analytical Potency Methods

ARL has completed validating potency methods for the drugs listed below. The validation protocols and criteria are based on requirements in USP <1225> as well as FDA and ICH guidelines. Potency testing using these methods is provided at no additional cost and allows us to remove the non-validated disclaimer from the CoA. These validated methods use the HPLC instrument to test for potency and are designated on the CoA as AMIF. Click on the links below for the method validation summary documents that you may save for your records.

5-Hydroxytryptophan	\$150
7-Keto DHEA	\$150
Alprostadil	\$150 (concentrations \geq 5 mcg/mL)
Alprostadil in a mixture	\$150 (concentrations \geq 5 mcg/mL)
Amlodipine Besylate	\$150
Anastrozole	\$150
Atropine Sulfate Monohydrate	\$150
Baclofen	\$100
Benzyl Alcohol	\$150
Benzyl Benzoate	\$150
Bupivacaine HCl	\$150
DHEA	\$150
Diphenhydramine HCl	\$150
Estradiol	\$100
Estriol	\$100
Estrone	\$100
Fentanyl Citrate	\$150
Hydroxyprogesterone Caproate	\$150
Labetalol HCl	\$150
Levothyroxine (tritirates)	\$150
Levothyroxine (tablets / capsules)	\$150
Lidocaine HCl	\$150
Liothyronine (tritirates)	\$150 (tritirates \geq 5 mcg)
Liothyronine (tablets / capsules)	\$150 (tablets / capsules \geq 5 mcg)
Medroxyprogesterone Acetate	\$150
Methylprednisolone Acetate	\$150
Metronidazole Benzoate	\$150
Nandrolone Decanoate	\$150
Neostigmine Methylsulfate	\$150
Papaverine HCl	\$100
Phenol	\$150
Phentolamine Mesylate	\$150
Phenylephrine Hydrochloride	\$150
Pregnenolone	\$150
Progesterone	\$100
Ropivacaine HCl	\$150
Sildenafil Citrate	\$150
Tadalafil	\$150
Testosterone	\$150
Testosterone Cypionate	\$150
Testosterone Enanthate	\$150
Testosterone Propionate	\$150
Triamcinolone Acetonide	\$150
Triamcinolone Diacetate	\$150
Tryptophan	\$150
